St. Louis (IL-Section)	5.9%	6.3%	-0.4
Illinois Statewide	5.3%	6.0%	-0.7

* Data subject to revision.

CHICAGO – Unemployment rates in Illinois fell in 12 metro areas, increased in one and remained the same in one. Seven metro areas across the state saw job loss compared to a year ago, according to preliminary data released today by the Illinois Department of Employment Security (IDES) and the U.S. Bureau of Labor Statistics (BLS). Not seasonally adjusted data compares October 2015 with October 2014.

Illinois businesses lost jobs in seven metro areas including the Quad Cities (-2.1 percent, -3,900), Carbondale-Marion (-1.6 percent, -900), and Peoria (-1.0 percent, -1,800). Illinois businesses added jobs in six metros, in which the largest increases were seen in: Danville (+1.7 percent, +500), Elgin (+1.6 percent, +4,200), and Chicago-Naperville-Arlington Heights Metro Division (+1.4 percent or +49,600). The industry sectors recording job growth in the majority of metros were: Retail Trade (nine of 14), Leisure and Hospitality (nine of 14), Transportation, Warehousing and Public Utilities (eight of 14), and Education and Health Services (eight of 14).

“We are thankful for every single job we have gained since the national recovery began in July 2009,” IDES Director Jeff Mays said. “However, at Thanksgiving 2015, too few Illinois residents are feeling this turnaround.”

The not seasonally adjusted Illinois rate was 5.3 percent in October 2015 and stood at 12.2 percent at its peak in this economic cycle in January 2010. Nationally, the not seasonally adjusted unemployment rate was 4.8 percent in October and 10.6 percent in January 2010 at its peak. The unemployment rate identifies those who are out of work and looking for work, and is not tied to collecting unemployment insurance benefits.

Total Nonfarm Jobs (Not Seasonally Adjusted) – October 2015

Metropolitan Area	October 2015*	October 2014**	Over-the-Year Change
Bloomington MSA	96,200	95,500	700

Wayne County	6.4%	6.0%	0.4

South Central Illinois Highlights

Unemployment declined in 13 of 18 counties in South Central Illinois when compared with one year ago. Workforce conditions continued to gradually improve during the year. The data is not seasonally adjusted.

Over the year, employment advances were reported in Retail Trade and Transportation in South Central Illinois. Employment in Health Care Services continued to expand. Payroll gains occurred in Manufacturing and Professional-Business Services. Agriculture remained active for the fall harvest. Construction activity, especially road and commercial projects, remained at significant levels throughout the fall. Government and Mining employment declined during the past year.

Numerous employment opportunities in the fall of 2015 were advertised in Health Care and Transportation. Job openings also were reported in Office and Administrative Support, Sales, Management, and Production occupations. Workers were needed in Computer Services, Engineering, Construction, Food Services, and Installation, Maintenance, and Repair occupations.

The unemployment rate identifies those who are out of work and seeking employment. A person who exhausts benefits, or is ineligible, still will be reflected in the unemployment rate if they actively seek work.

Note:

- Monthly 2014 unemployment rates and total non-farm jobs for Illinois metro areas were revised in February 2015, as required by the U.S. Dept. of Labor, Bureau of Labor Statistics (BLS). Comments and tables distributed for prior metro area news releases should be discarded as any records or historical analysis previously cited may no longer be valid.
